## spa sounds

If you're looking for the perfect tunes for your treatment rooms, Real Music has got you covered.

The California-based independent label has been offering spas a variety of music for the last 25 years. It currently has more than 200 exclusive CDs in its library, with digital formats available for use on iPods. The company can also help you retail the CDs you use in your treatments, with customized CD packaging with your spa name and logo at the top.

"It's a unique offering, that can help further extend the brand," says sales director Jamie Russell. The variety of music covers just about every treatment in the spa, from yoga classes to relaxing massage, and if you're overwhelmed by the available choices, Russell's staff is great at making suggestions based on your type of spa and how and where you want to use the music.
